EDUCATION

- **B.Tech Computer Science Engineering – (AI & ML)** **2022 – 2026**
  Malla Reddy University (Current) *CGPA – 8.97/10*
- **Intermediate Education** **2020 – 2022**
  Narayana Junior College *Percentage – 91.1%*
- **Secondary Education** **2020**
  M.D.A.V Public School *Percentage – 77.8%*

EXPERIENCE

- **Nuclear Fuel Complex (NFC), DAE (Govt. of India) | LINK** *Dec 2025 – Jan 2026*
  Student Trainee – Computer Division On-site
- Contributed to a confidential project in the Computer Division, supporting development, analysis, and documentation tasks while strictly adhering to security and confidentiality protocols
- Collaborated with technical officers on project-related workflows, assisting in structured problem-solving, requirement understanding, and secure implementation processes without disclosing sensitive information.
- **Viswam.AI | LINK** *May 2025 – Jul* 2025
  AI Developer Intern Remote
- Led technical development initiatives as Tech Lead at Viswam.ai, overseeing project architecture, guiding a team of developers, and ensuring high-quality, timely delivery of AI-driven features.
- Gained hands-on experience with AI development workflows, assisting in model experimentation, testing, and understanding data pipelines under the guidance of senior engineers.
- **EY GDS | LINK** *Feb 2025 – Mar 2025*
  Full Stack Developer Intern Remote
- Built and deployed MERN applications to improve performance and user experience.
- Optimized backend APIs and integrated front-end features, resulting in a 25% improvement in web application speed.

PROJECTS

- **Brain Tumor Detection |** *TensorFlow, Keras, Python* | **LINK** *Jul 2024 - Nov 2024*
- Built and trained a CNN model to classify brain MRI images into tumor vs. non-tumor, enhancing diagnostic support.
- Applied image preprocessing (normalization, resizing, augmentation) to improve model robustness and reduce overfitting.
- Achieved 97% validation accuracy through architecture optimization and hyperparameter tuning.
- **AI Based Resume Builder |** *Flask, Python, NLP, HTML/CSS* | **LINK** *Jan 2025 - Mar 2025*
- Built a web-based resume generator using Flask that creates structured resumes from user inputs with AI-driven formatting rules.
- Integrated basic NLP to auto-suggest relevant resume sections and enhance content organization.
- Designed a responsive frontend interface for user-friendly input and PDF download support.
- **Text-to-Image Generator using DALL-E** | *Python, Flask, OpenAI API* | **LINK** *Mar 2024 - Jun 2024*
- Created a Flask-based app that generates images from text prompts using OpenAI's DALL - E API.
- Handled API integration, input validation, and dynamic image rendering with minimal latency.
- Demonstrated prompt engineering and Generative AI application in real-time interfaces.

TECHNICAL SKILLS

- **Frontend Development:** HTML, CSS, JavaScript
- **Backend Development:** Flask
- **Databases:** MySQL, MongoDB
- **Programming Languages :** Python, Java
- **AI & Data Science:** Machine Learning, Deep Learning, Natural Language Processing
- **Data Analytics:** Pandas, NumPy, Matplotlib, Seaborn
- **Tools & Version Control:** Git, GitHub

ACHIEVEMENTS

- Winner – Google Developer Group Gen AI Study Jams.
- Finalist – Innovation & Entrepreneurship Summit.
- Presented AI-driven project at National-Level Project Expo.
- Led 5+ workshops as an MLSA, engaging 50+ participants.
- Earned 60+ Microsoft Learn Badges.
- Student Coordinator for various technical events, workshops, and departmental activities.
- Selected for a prestigious national-level AI internship focused on NLP.
- Appointed Tech Lead for driving high-impact AI solutions in low-resource Telugu language modeling.
- Completed Deep Learning and Java Programming certifications (NPTEL – IIT Madras and IIT Kharagpur)
- Contributed to Google Developer Groups, engaging 100+ participants.
- Earned 15+ Google Cloud Skills Boost badges.
